Systems Development

About Us

ASRC Federal Mission Solutions (AFMS) is part of a family of companies owned by approximately 13,000 Inupiat shareholders. Through our technical innovation and excellence, we leverage every aspect of our culture, values and investments in our people and programs to protect our country's weapons systems.

Headquartered in Moorestown, New Jersey, AFMS has expertise in complex domains from subsurface warfare to low-Earth orbit. We provide systems engineering, software engineering, integration services and products for mission-critical defense systems worldwide.
